(4) Rejection	23	Wolf et al. + others	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/> Continuation Sheet Attached					

Brief Description of Arguments to be Presented:

Applicant seeks clarification of the examiner's rejections, particularly with respect to the claim limitations of claims 1 and 13 requiring a load shaft having a first end adapted to be secured to the mounting surface and a second end extending beyond the base, and an actuator having a mounting end adapted to be secured to the base. With respect to claim 23, the references do not teach a mounting stud extending from the mounting surface through the base, or a retrofitting method in which a seismic isolator is installed without moving the structure.

An interview was conducted on the above-identified application on _____.

NOTE: This form should be completed by applicant and submitted to the examiner in advance of the interview (see MPEP § 713.01).

This application will not be delayed from issue because of applicant's failure to submit a written record of this interview. Therefore, applicant is advised to file a statement of the substance of this interview (37 CFR 1.133(b)) as soon as possible.
